

**U.S. Environmental Protection Agency Region 7  
Announces Record of Decision Signed  
Cherokee County Superfund Site – OU8  
Cherokee County, Kansas**

The U.S. Environmental Protection Agency (EPA) Region 7 announces that a Record of Decision (ROD) with the Selected Remedy for the Remediation of Inactive Rail Lines at the Cherokee County Superfund Site, Operable Unit 08 (OU 08) – Railroads in Cherokee County, Kansas, was signed on September 23, 2016. The Selected Remedy includes the remediation of mine waste and contaminated soils associated with the inactive rail lines in OU 08 – Railroads. The mine waste and contaminated soil will be excavated and capped within existing or future consolidation areas in other Site OUs: OU 03 – Baxter Springs Subsite and OU 04 – Treece Subsite.

The ROD may be viewed online at:  
<https://semspub.epa.gov/src/collections/07/AR/KSD980741862>.
